

## Mark 8:22-10:52 Selected Primary Structure

In this doc I identify what I regard as the most important primary structure uniting this long major Unit of Mark's gospel. Answering a partial (only) set of interpretive questions for this structure is your assignment for this Module. Keep in mind the process:

- In Video 1, I introduced the process of IBS Interpretation.
- In this video, I introduce the first Primary Structure for Mark 8:22-10:52. That will set the stage for your assignment for this Module.
- In Video 3, I will model IBS Interpretation using Mark 8:22-26. That will serve as a Model for your own work on Mark 10:46-52.

### Primary Structure #1: Inclusio

Opening Frame → <b>Mark 8:22-26</b> Jesus heals a blind person	Central Section <b>Mark 8:27-10:45</b>	← Closing Frame <b>Mark 10:46-52</b> Jesus heals a blind person
--	---	---

#### *Partial (only) Set of Interpretive Questions*

1. What are the key components of *the second* framing section (10:46-52) and what do they mean?
2. Based on my Interpretation work on 8:22-26, in what ways are 8:22-26 and 10:46-52 alike? In what ways do they differ?
3. What is the significance of these similarities/differences?
4. How do the similarities and differences between the framing sections help us understand the meaning of the content between the framing sections in 8:27-10:45?
